Full Stack Developer Internship

Description

Custom Design Partners is a full-service digital marketing agency located in Jacksonville, Florida. As a Full Stack Developer Intern here in Custom Design Partners, you will be tasked alongside other full-stack developers for our various clients. Full Stack Developer Intern responsibilities include building websites from concept to completion and from the bottom-up, fashioning everything from the home page to site layout and functionality.

Responsibilities

- Understand overall architecture of the web application
- Build efficient and reusable front-end systems
- Work closely with other team members and create collaborative solutions and standards
- Understanding and implementation of security and data protection
- Development experience for both mobile and desktop

Qualifications

- A creative problem solver and attend to detail
- Familiar with HTML/CSS/JS
- Familiar with backend development using Ruby, PHP, Python, and .NET
- Familiar with relational databases
- Excellent verbal and written communication skills
- Pursuing a degree in Computer Science, Engineering or equivalent
